

SECURE COMPARTMENTED MODE KNOWLEDGE MANAGEMENT PORTAL

ABSTRACT OF THE DISCLOSURE

5 A layered defense-in-depth knowledge-based data management comprises a
reception zone for authenticating a user for access to the system and an operations
zone for adjudicating on a user level access to data objects stored in the system
database. In addition, the data management comprises a security zone for issuing
certificates of accessibility for defined users and a screening zone to interrogate data
packets during processing thereof. The first line of defense is firewall protection and
10 packet filtering preceding the reception zone.
